Subject: Sampling event

Susan and Dante,

Our first sampling day worked well but was cut short by a meeting. We can hold the 9 samples here (we have adequate holding time and secure refrigerator space). but I do have a few questions:

- It is not clear where the samples should be sent? I am assuming directly to the lab and not Richmond.

- Is there a procedure for the PE samples? Do they go to the field? Do they require refrigeration?

- I am moving through the SCRIBE and other software slowly but with success, any advice on tech support?

We are proposing March 1, 3 and 8 for our next samples days which should conclude the program. We are current rained/snowed out of the field until then (this time of the year has highly variable weather here). I would like to get water samples on March 1 or 3 (do you need containers?).

I apologize if the answers are in previous emails, we have quite a few back and forth, but it was not clear after I reviewed all of it. Thanks again for your help,

Dietrick
